

Lab Performance 1

Student

ID	Mark1	Mark2	Mark3	Mark4	CGPA	Grade
1	40	50	60	70		
2	60	70	75	76		
3	83	56	90	40		
4	70	80	40	90		

Student_log

Log_id	Student_ID	Operation	Log_timestamp
1	1	insert	
2	4	update	

Using trigger

- Insert the values into total_mark and CGPA column
- Insert data in student_log table when any row inserted into student table like row 1
- Perform update operation on Student table that will trigger to insert a row into student_log table like row 2

Lab Performance 2

- Write stored procedure to find the total mark and avg mark using out parameter
- Insert one row in student table using stored procedure
- Create view of student_log table where operation = 'insert'
- Create view of students whose cgpa above 3.25
