My Intention to be in University

Obviously, I need a degree, a job like everyone. But my intention for get in the university is not only to obtain a degree but also make myself capable enough to a certain point where I can make a difference. I have to make my life impactful. I can't just born & die. I want to make myself productive for the world. University is the place which will pave my ways to reach my destination.

I believe university is not only beneficial for the educational aspect but it also helps to build networking, opportunities, and it also helps to culture myself. I got myself admitted to a reputed university where I hope, I will have the opportunity to meet so many new and different people who are coming from different places. Not only I will be able to meet them but also learn about their different cultures and customs which I think is very beneficial for me. It's Important to become aware of different cultures. It will prepare me to be more successful in this world because I will meet a lot of different people throughout my life. Another amazing thing I think is great about university is all the opportunities! There are so many different clubs, sports, internships, job opportunities to be discovered throughout the university. University is my time to explore! I will meet so many people with different majors and ideas for their lives, which I can learn and build that of. The clubs and organizations of university will help me to create social connections and enhance my networking skills and also create amazing friendships for my whole life.

So, I think university is an amazing opportunity to build a dream life for myself because I will have been introduced to all of these different things and career paths that I have never heard of before. This will allow me to explore and choose the perfect major and career path for myself so that one day I will enjoy what I am doing with the rest of my life. Lastly, I think university is an amazing place to really figure out who I am and what I want to do with my life. Overall it will help me to discover my identity and contribute effectively to the society.
