Course Name : Art of Living

Course Code : GED131

Assignment no. 01

**Submitted by:**

**Student's Name:** Jarif Rahman

**DIU ID:** 212-15-4118

**Section:** PC-B

## My Intention To Be In Daffodil International University

To begin with, students aspire to be accepted into universities in order to gain more advanced knowledge about a particular field.

"A little knowledge is a dangerous thing," there is a saying that goes. My objective and goal while I was in class 9-10 was to be an engineer, however after being promoted to college and passing my Intermediate(HSC) exam, I set my aspiration and goal to be a CSE Engineer. However, CSE has a large field with numerous sectors, such as (Game Programmer, Robotics, Web Designer, Graphics Designer, and so on), and I was unsure which one to chose. Now that I've been accepted into Daffodil International University, my goal has become more specific: I want to be a game programmer.

Actually, students enroll in universities so that, after graduation, they can start their own business or work for a certain company in order to live a luxurious, uncomplicated, and successful life in the future.

So that was my plan for getting into university.
