"Why did I get admitted to the university?"

Knowledge is power. University period is the key to knowledge, which will contribute a lot to the future of an individual. Going to university is a great way to expand our knowledge. During university life we meet new people and enjoy new experience. University is about more than an education and also university offers more than a pure knowledge. University experience gives to the knowledge, skills, confidence and experience to help us make our world better. An university can help students to build their self-confidence and independence. Living independently can make us more mature and also increased level of responsibility. There students will have a good opportunities to make new friends from different background. A degree from a university gives people certain identity that makes them more valuable. When achieving a degree at a university we can get a better understand of the society. There is no doubt that university can be the turning point of one's future. That's the reason I want to get admitted to the university. Last but not least I strongly believe that everyone should attend university.
