

Report-1:- Display your name and ID at center and add a background color.

Work details:- Usually when we do android development, we have to work on two pages one page is xml and another page is Java.

- ① Firstly we design which is done through XML
- ② Secondly we do background work and database work through Java.

A Project in Android studio opens two files namely activity\_main.xml and MainActivity.java. Activity\_main.xml.

- ① In this xml file I have used linear layout and I used to center all elements.
- ② I take another linear layout for border I create this border radius and take from drawable.

Text view for name:- The text is placed within the Textview tag. Here android:layout\_width and android:layout\_height is wrap-content.

I take a text from string is Tahmid Hossain and gave text size which is 20dp and also added textcolor which is white.

Another Text view for ID:- In this textview everything is done as before. Here only student ID text is places inside the android:text from string and also gave text size which is 20dp and 5dp margin in.
