

Report-5:- Apply different methods on "onclicklistener".

work details:- Firstly I work in Activity_main.xml and then I work in Java file using ID.

Activity_main.xml:-

- ① Image view:- Image through Image view and also added height and weight.
- ② Text view:- Text through text view and also added height and weight.
- ③ Button and Image Button:- In android Application, we can write something in Button and also added Image and another for Image Button tax for Image.

Main Activity.java:- Public class Main Activity extends AppCompatActivity with add implement view on click listener, which is another different onclicklistener.
