

From this lecture we know about the basic form of surveying.

Specially introductory Lecture this was but it was very informative, we get know about the difference between the leveling and surveying chain survey is included.

many kind of words was new to us, it was very informative. we know, to gather basic knowledge, we have to know basic thing, and it was the part of basic. difference between two or three points which are related with surveying and the section of basic equations of the plane and unplaned surfaces.

this was very useful information.
