# **Course Description:**

Bangladesh Studies is a second year course at Daffodil International University. It introduces students to the economic and political history, economic geography, environment and development of Bangladesh. Students learn about Bangladesh's historical phases of development and different influences and events which have shaped national economy over the years. Through their studies, students also gain an understanding of differences in perspective that have shaped economic policies over the years. Students also consider the environmental and development issues facing Bangladesh; this will encourage a better understanding of the interaction between economy and environment, as well as future economic challenges and opportunities facing Bangladesh

## **Course Objectives:**

The objective of the course is to acquaint the students with the socio-economic phenomena of Bangladesh. The knowledge will assist the students of business school to view the business world of Bangladesh with economic lens. The course not only furnishes the students with economic lens but also shows how to use the for Bangladesh. Knowledge of the course will help to understand the trend of economic variables, business phenomena and socio-economic condition of people. The knowledge will include some remedial measures for the development of Bangladesh economy.
