

Flow chart Completion Skill Building Exercise 1

Doll Restoration

This is a good example of how the average doll collector receives a doll. They will find a beautiful antique doll that does not look as beautiful as it should, but with proper restoration, she can be as beautiful as the day she was created. Here, there are two main problems, the eye mechanism has lost its original look, and it has a loose head. We removed the mohair wig and removed the eye system. Then we separated the head from the composition body and chemically cleaned the head, removing old dirt, and wax, but not harming the original artwork. We repaired the missing porcelain teeth by making duplicate porcelain teeth to match and reinserted them. Then we took the original eye system and reconditioned it. We then did the waxing of the eye mechanism and reset the eyebar so the eyebar would open and close as it originally did. What a wonderful difference to chemically clean and restyle the original mohair wig. Our seamstress took over point with suggestions from the owner on likes and dislikes using original period designs. She now looked, I'm sure, very much as she would have originally looked when the little child fell in love with her for the first time.

Questions 1 – 8. Complete the flow chart below. Choose NO MORE THAN THREE WORDS for each answer.

Answer Key:

1. (the) eye mechanism
2. (a) loose head
3. Separated
4. old dirt
5. wax
6. original eye system
7. (original) mohair wig
8. clothing designs
